SKILLS SUMMARY

- Programming Languages- C/C++ , C# , Python , Java
- **Backend-** .NET Core , Express.js with Node.js, Flask | **Database-** MongoDB, MySQL, PostgreSQL, Redis for Caching | **Version Control-** Git, Jenkins
- **Docker** | Container Orchestration using **Kubernetes** | Web Scraping and Automation using **Selenium**
- ML Algorithms | Data Preprocessing,NLP | Neural Networks (ANN,CNN,RNN) | Tensorflow
- **Soft Skills-** Quick Learner, Leadership, Event Management, Public Speaking, Communication

EXPERIENCE

- Software Engineer Intern - A.P. Moller - Maersk , Bengaluru, India** Nov 2022 - Nov 2023
- Implemented configurations and code migrations utilizing .NET Core 6 for the release of v2 ADC project, resulting in 30% reduction in build time in VMs.
 - Played a key role in the adoption of Kubernetes orchestration, optimizing project deployment processes.
 - Introduced protection to dll files generated in runtime during build process of solution.
 - Managed live ad-hoc configuration changes within 130+ vessel connectors, ensuring seamless alignment with project specifications and demands from ship engineers.
 - Technologies used: C# , .NET 6, Kubernetes, Docker, MySQL, Git, Python, Grafana.
- Trainee - Amazon ML Summer , Bengaluru, India** July 2022 - Aug 2022
- Gained in-depth knowledge on key ML and DL topics from 5 Amazon Scientists.
 - Hands-on project with mentors to apply concepts in real-world situations.
 - Skills: Statistics , Python 3, Machine Learning algorithms.
- Jr. ML Engineer - Omdena , Bengaluru, India** May 2021 - July 2021
- Compiled a dashboard for the Human Rights Foundation to display real-time war-crimes around the globe.
 - Built an NLP model to categorize the war-crimes related posts that were extracted from the social media platforms involving 10L total posts, providing real-time monitoring.
 - Skills: Python 3, NLP , Web Scraping , APIs , Machine Learning , Database Management.

EDUCATION

- **Indian Institute of Technology, Hyderabad** Hyderabad, India
Master of Technology (MTech) - Computer Science and Engineering - NIS July 2025 - Present
- **RNS Institute of Technology** Bengaluru, India
Bachelor of Engineering (B.E.)- Electronics & Communication Engineering; GPA: 8.3 July 2019 - July 2023

PROJECTS

- **Cheque Verification and Clearing System:** Created a system to verify an input cheque on parameters like Account number, MICR, IFSC code, Signature etc. to be cleared if valid, achieving 96% accuracy.
Skills - Python, Image Processing, Machine and Deep Learning Algorithms.
- **Docker & Kubernetes Scaling on Web API:** A .NET 6 Web API with multiple endpoints and database migration using SSMS, containerized the API solution and implemented Kubernetes orchestration.
Tools - .NET Core 6, Docker, Kubernetes, SSMS, MySQL, Swagger API.
- **ML Model Deployment:** Developed a Regression Model with 95% accuracy, created a Frontend for it and deployed using Flask and dockerized it. Skills- ML, Data Preprocessing, Scikit-learn, Docker.
- **Web Scraping & URL Classification:** Extracted information from 1200+ websites using Selenium and classified the websites using CNN. Skills - Python, Selenium, Machine Learning.

ACHIEVEMENTS

- Scored 99.6 percentile in GATE'25 CS examination, achieving AIR 609. - Feb, 2025
- Coding Ninjas - 2235 rating ; Codechef - 1604 (3 star) max rating - April, 2024
- Awarded IEEE best project in Open House'23 for Cheque Verification and Clearing System - July, 2023
- AIR 681 in AccioWars Coding Contest by Accio Jobs with 12k+ active participants. - July, 2022

VOLUNTEER EXPERIENCE

- AI/ML Core Member at Google Developers Club RNSIT - Sep 2021 - July 2023 Bengaluru, India
Conducted 5 online and 2 offline technical & soft-skills training and workshops.
- Event Organizer at Technoids RNSIT - Aug 2021 - Nov 2022 Bengaluru, India
Conducted a 30 days python bootcamp in online medium (youtube livestream).
